

Create A Custom Profile-2

- 1.Create a profile with the profile name as “Sales Manager”.
- 2.From setup, enter profiles in Quick Find box
- 3.Select profiles (Standard user).
- 4.Click clone.

The screenshot shows the Salesforce Setup interface for editing a profile. The left sidebar contains a search bar with 'profile' entered, and a list of categories including 'Users' and 'Profiles'. The main content area is titled 'Profiles' and shows the 'Profile Edit' form for 'Sales Manager'. The form includes fields for Name, User License, and Description, along with a 'Custom Profile' checkbox. Below the form is a 'Custom App Settings' table with columns for 'Visible' and 'Default' for various applications.

Visible		Default	
Analytics Studio (standard__Insights)	<input type="checkbox"/>	<input type="radio"/>	
App Launcher (standard__AppLauncher)	<input type="checkbox"/>	<input type="radio"/>	
Job Application Tracking (Job_Application_Tracking)	<input type="checkbox"/>	<input type="radio"/>	
Platform (standard__Platform)	<input checked="" type="checkbox"/>	<input checked="" type="radio"/>	
WDC (standard__Work)	<input type="checkbox"/>	<input type="radio"/>
