Creating a Salesforce Developer Org

- **Creation of Developer Account (Milestone 1):** This involves setting up a developer account on the Salesforce platform, which will serve as the foundation for building the CRM application.
- **Object Creation (Milestone 2):** Custom objects and relationships will be defined to efficiently store and manage data related to job applications, recruiters, and other relevant information.
- **Tabs Creation (Milestone 3):** Tabs will be configured to provide user-friendly access to different sections and functionalities within the CRM application.
- **Create App (Milestone 4):** The CRM application will be created, and it will serve as the central hub for managing job applications and accessing job postings.
- **Fields & Relationships (Milestone 5):** Custom fields and relationships will be established to capture specific data attributes related to job applications and recruiters.

- **Profile (Milestone 6):** User profiles will be configured to define access permissions and roles within the application.
- **Role and Role Hierarchy (Milestone 7):** Role-based access control will be set up to determine who can view and edit specific data within the CRM.
- **Users (Milestone 8):** User management will involve adding and configuring user accounts, specifying their roles and access levels.
- **Sharing Rules (Milestone 9):** Sharing rules will be defined to ensure that users can appropriately share and access data based on predefined criteria.
- **User Adoption (Milestone 10):** Strategies and tools will be implemented to encourage user adoption and make the application user-friendly.
- **Reports (Milestone 11):** Custom reports will be created to track and analyse job application data, providing valuable insights for users.
- **Dashboards (Milestone 12):** Dashboards will be designed to display key performance indicators and visual summaries of application data.
- The project aims to create a comprehensive CRM application that helps job applicants track their applications and access job postings from recruiters. It covers the technical architecture, data modeling, and user adoption aspects of Salesforce. The scope is to deliver an efficient, user-friendly, and productive tool for managing the job application process within the Salesforce platform.
